

Environment Policy

Active internal environmental- and employment protection is an important factor of the corporate policy and the base of our business connections, as we

- Maintain the legal and official obligations of the environment, employment, and health protection,
- Train our staff and use their ideas for the improvement process,
- Actively influence the environmental issues on product design, recycling, disposal, packaging and transport together with our customers,
- Assess products, processes and practices under the factor of environmental risks and job safety in progress and at existent workplaces, such as,
 - Calculating and estimating environmental aspects,
 - Effective threat analysis,
 - And executing objectives, programs and measures

To protect our staff and the environment in consideration of ensuring the commercial commensurability.

In this connection we focus on the decrease of:

- The consumption of energy, water and other resources,
- The input of dangerous goods by substitution,
- The amount of waste and sewage.

As well as preventive measures in the distress foresight and danger defenses.

- Implicate our suppliers, service companies and the intermittent acting persons by informing them about.
